## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Response to Election***

Applicant's election of species A as illustrated in figures 1-16 in Paper No. 7 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 7-10 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b) as being drawn to a non-elected species. Election was made **without** traverse in Paper No. 7.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by applicant cited reference Haselden (WO 96/20382). See Figures 1-5 and 7, page 6, lines 21-333, 16, lines 24-25 and page 19, lines 1-7. Large passage(s) (38b,48b) and small passages (36,36a,46,46a).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. § 103 which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3753

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

Claim 11 is rejected under 35 U.S.C. § 103 as being unpatentable over Haselden in view of Garner et al. The device of Haselden discloses all the claimed features of the invention with the exception of a catalyst on the outer fin.

The patent of Garner et al., in figures 1-3, column 3, line 41 through column 4, line 55 and column 6, lines 32-50, discloses that it is known to have a catalyst on an outer fin for the purpose obtaining a coating which is economical and easy to apply which inhibits microbial growth and improves treated air quality. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to employ in Haselden a catalyst on an outer fin for the purpose obtaining a coating which is economical and easy to apply which inhibits microbial growth and improves treated air quality as disclosed in Garner et al.

Art Unit: 3753

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
